

To ALL of you at Iowa River Hospice, we are forever grateful for the care you provided Dad in the last week and a half of his life. From the time Dad entered your building until the time he left, he was taken care of without any worries from us. Dad was confused and very weak due to his congestive heart failure, but you were so patient and kind to him, and you went above and beyond to see he was properly cared for. We never had to question or worry about a thing. That was a Godsend, as we were exhausted between nursing home and hospital visits, trying to figure out where to go next. There are so many names to list, and I can't possibly remember them all, but you know who you are, and you should be so proud of the job you do. You are selfless people. You are caring and loving. I never had to feel bad for calling for an update on Dad. I'm typing this with some tears in

my eyes because I know you truly cared about him. We were relieved he was a candidate for IRH, because we have heard nothing but good things, and he needed extra care, and he definitely got more than that.

Thank you, thank you, thank you for everything you did for our beloved family member.
